Summary

Junior Front-End Developer with practical experience in developing websites with HTML, CSS, JavaScript and React. I completed a three-year Web Development programme at Software University (SoftUni), where I gained solid technical skills and developed a strong interest in clean, user-centred design. I am known for my attention to detail, and I enjoy refining layouts, components, and interactions to improve usability and visual consistency. I am a team player who values clear communication and continuous learning. I am open to feedback, eager to grow professionally and motivated to contribute to real-world projects that improve user experiences and bring creative ideas to life.
